Notes & Methodology

1. Date Tested: 07/07/2026. Methods: Purity & Quant (HPLC).
2. The sample was confirmed to be BPC-157 / TB-500 by HPLC. Identification by chromatographic retention time comparison with a reference standard.
3. Peptide purity determined by RP-HPLC area normalization at 214 nm. Value represents the percentage of the target peptide relative to all peptide-related peaks. Non-peptide process-related impurities, if detected, are excluded from the calculation.
4. Per-component content calculated from total net peptide content using the manufacturer's stated formulation ratio (BPC-157, TB-500/TB-4). All components confirmed present by HPLC identity testing, unless explicitly stated otherwise.
